

AZURE WEB APP

Name: Agateeswaran K

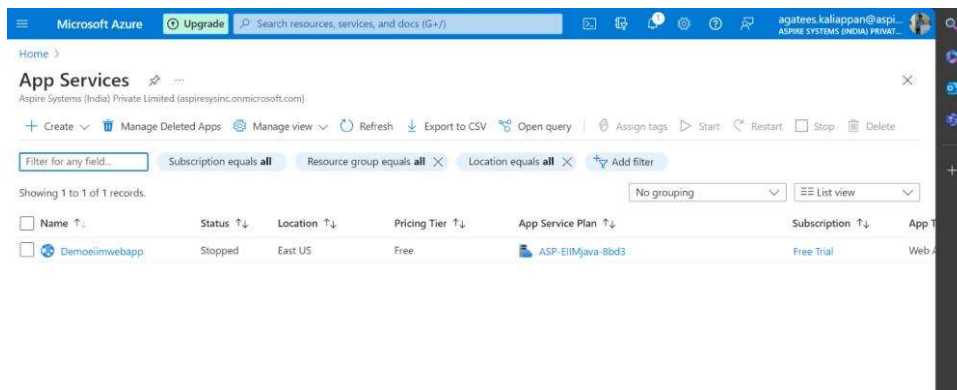

Date: 02/02/2024

Open azure portal where we can try to create a web application

Inside the app services we can create and view the web application's status and other details

Home >

Stopped

As we are using the free trial account, we can only create web app or the static web app not the web app along with databases.

We have to name the instance and select the resource group or create a new resource group and select the region where you need to host the instance. Select the runtime stack according to your project. As I developed my project in java, I'm selecting java 17 which is the LTS one.

all your resources.

Instance Details

Name * Agateeswaran ✓ .azurewebsites.net

Publish * ☒ Code ☐ Docker Container ☐ Static Web App

Runtime stack * Java 17 ▼

Java web server stack * Java SE (Embedded Web Server) ▼

To access the instance the URL is instance name .azurewebsites.net .

On selecting the review and create the site redirects to another site where we can see the instance's information. After reviewing the instance info we can go ahead and create the instance.

Wait for the instance to be deployed.
