

Bitbucket demo

Name: Agateeswaran K

Create a workspace and repository

Create a workspace

A workspace is the place where you can store and share your code and content

Workspace name *

EIIM

Workspace ID *

bitbucket.org/ eiimdemo

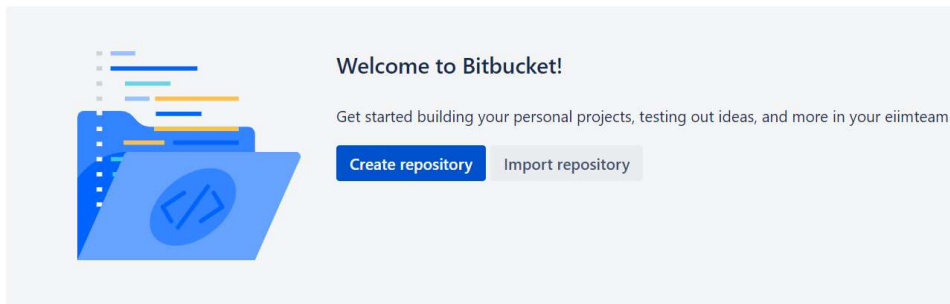

This will be the URL for your workspace

☒ Keep this workspace private

Create

Cancel

Start creating the repository by providing the necessary details and proceed

Create a new repository

[Import repository](#)

Workspace

Project name*

Repository name*

Access level ☐ Private repository
Uncheck to make this repository public. Public repositories typically contain open-source code and can be viewed by anyone.

Include a README? Yes, with a tutorial (for beginne... ▼

Default branch name

Include .gitignore? Yes (recommended) ▼

[Advanced settings](#)

[Create repository](#) [Cancel](#)

After creating the repository, we need to push the project files to the bitbucket repository.

Using the git version control

```

```

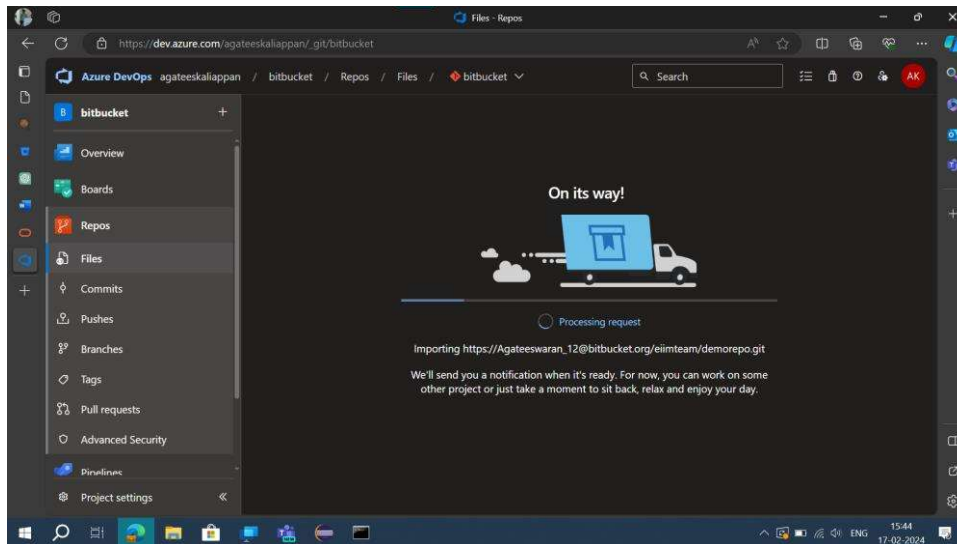

Create a new project in Azure DevOps platform.

Then import the bitbucket repository to the azure repo

Using the options and import the repo

Wait for some time for the file to import to the repo

bitbucket - Repos
