# WSO2 API MANAGER DEMO

Here in Context, we must use the resources which are provides in the endpoints
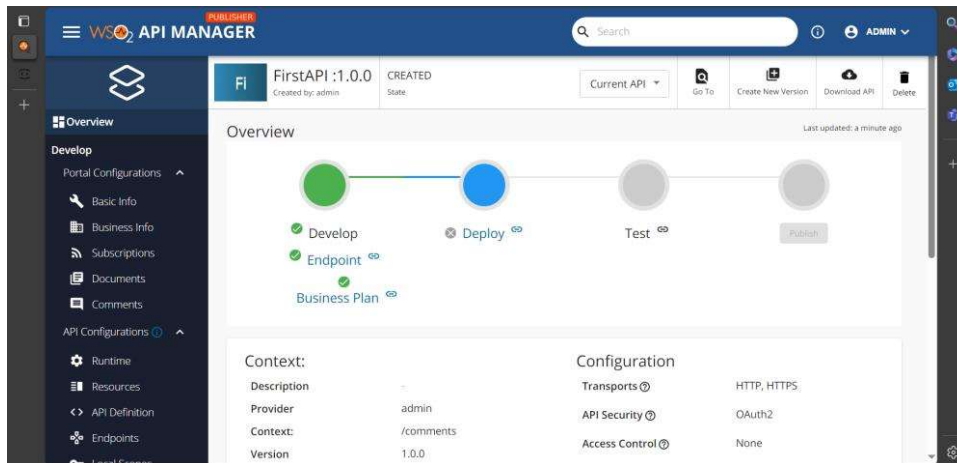

Resources

JSONPlaceholder comes with a set of 6 common resources:
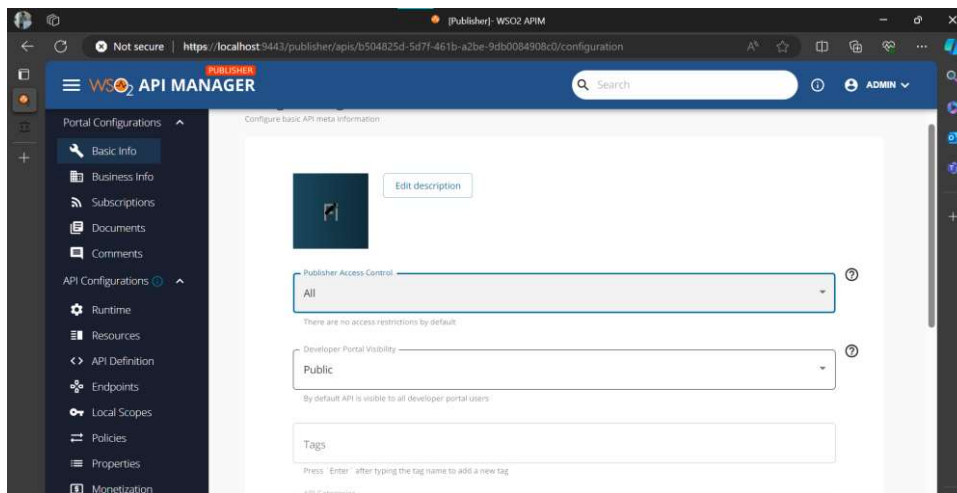

/posts	100 posts
/comments	500 comments
/albums	100 albums
/photos	5000 photos
/todos	200 todos
/users	10 users

**Note**: resources have relations. For example: posts have many comments, albums have list.

Then we must hit the create button.
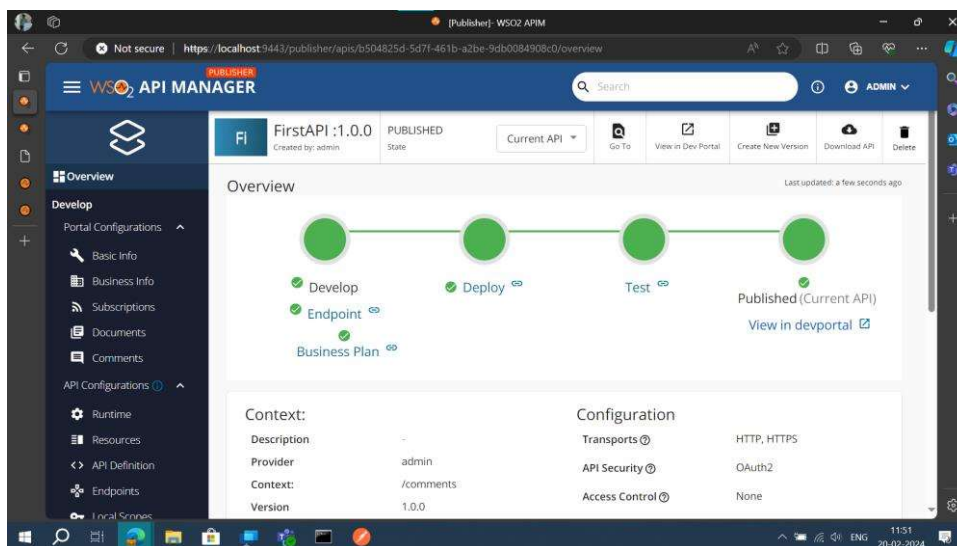

Then we have Configure the API

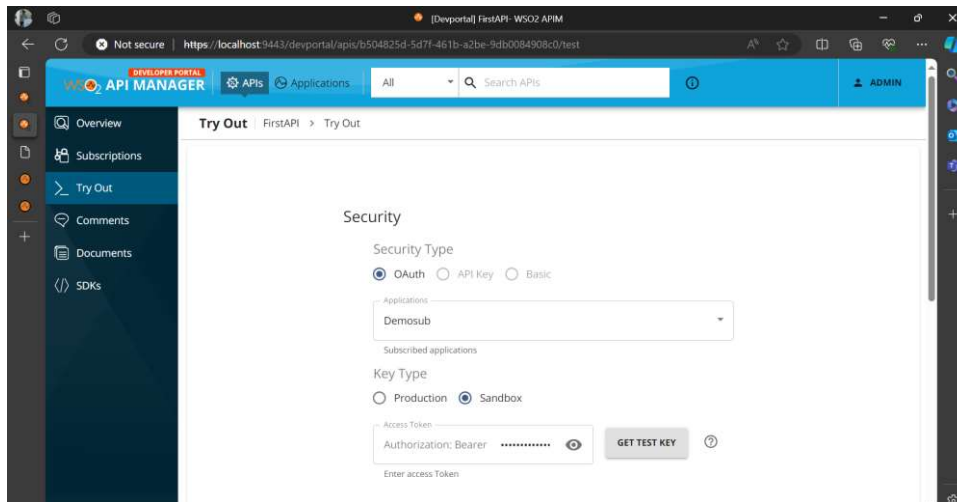

Then we can choose the business Plans

We can manage our Api's security related things here

Now publish the API

We need to create a Subscription.

Then we must create a security key to Authenticate ourselves.

In Postman we must Enter the URL int he get method and we must use the Security key for the
